TIME: 8:00am-12:00pm

Price:
SBE MEMBERS: Free

OSHA requires that any employee who performs work on a scaffold be trained to recognize hazards and how to control or minimize those hazards (1926.454(a)). The class will address supported scaffolds. Participants will be furnished a copy of the OSHA Construction Standard (29 CFR 1926) for use during the class, and may purchase a copy for \$25 at the conclusion of the class. Pre-registration is required for this course – no walk-in registrations will be accepted.
